<section id="about">
  <h2>Who Am I?</h2>
  <p>
```

I'm a Pre-final year B.Tech Computer Science Engineering student at Galgotias University (Batch 2023-2027), specializing in Artificial Intelligence and Machine Learning. I have a strong foundation in Data Structures and Algorithms using Java, and I actively sharpen my coding and problem solving skills through hands-on projects and regular practice.

```
</p>
<p>
```

Beyond academics, I'm deeply interested in how AI can be combined with software development to create real-world impact. I'm currently building practical experience in Full Stack Web Development working across both frontend and backend to understand how modern, scalable applications come together.

```
</p>
<p>
```

My goal is to grow into a well-rounded Software Engineer with expertise in AI systems, clean and maintainable code, and end-to-end product development. I'm passionate about learning, building meaningful tech, and constantly pushing myself to grow both as a developer and as a thinker.

```
</p>
```

```
<h3>What I'm Currently Learning</h3>
<ul>
```

- Full Stack Web Development
- Data Structures & Algorithms
- Artificial Intelligence & Machine Learning
- Critical Thinking & Software Design

<h3>Infosys Springboard | Artificial Intelligence Intern</h3>

<p>Jul 2025 - Present</p>

Assigned to a structured batch-based internship program in AI.

Exploring real-world AI applications through guided learning paths and practical modules.

Will soon be working on a capstone AI project involving NLP, data modeling, or real-life use case implementations.

</article>

<article class="work-item">

<h3>GirlScript Summer of Code (GSSoc'25) | Open Source Contributor & Project Mentor</h3>

<p>Jul 2025 – Present</p>

Contributing to real-world open source projects under mentorship in Java, Python, JS, and ML.

Reviewing PRs and guiding contributors on Git & GitHub best practices, clean code, and collaboration workflows.

Helping new contributors understand project structure, version control, and open-source ethics.

</article>

<article class="work-item">

<h3>Vault of Code | Web Development Intern</h3>

<p>Aug 2025 – Present</p>

Working on building a Student LMS Portal from scratch.

Developing the frontend using HTML, CSS, React.js, and Bootstrap for a responsive and user-friendly UI.

Backend development handled using Node.js, with data storage and retrieval through MongoDB.

Gaining full-stack development experience and collaborating in an agile, project-based environment.

</article>

<article class="work-item">

<h3>EduSkills (AICTE-Google) | AI/ML Virtual Intern</h3>

<p>Jul 2025 – Present</p>

Selected for the Google AI-ML Virtual Internship under AICTE EduSkills Foundation.

Learning AI and ML fundamentals, model evaluation techniques, and working on upcoming real-world projects.

Improving hands-on skills in Python, Data Science workflows, and machine learning pipelines.

</article>

<article class="work-item">

<h3>Prodigy Infotech | Software Development Intern</h3>

<p>May 2025</p>

Built an efficient Sudoku Solver using Python

Developed a Contact Management System with add, view, edit, and delete features in Python

- Created an interactive Guessing Game using Java Swing

- Designed a Java Swing app to convert temperatures between Celsius, Fahrenheit, and Kelvin

</article>

<article class="work-item">

<h3>CodSoft | Artificial Intelligence Intern</h3>

<p>May 2025 – Jun 2025</p>

Worked on image captioning AI models using BLIP

Used NLP and DeepSeek API via OpenRouter to build an AI chatbot.

Made Tic-Tac-Toe AI Game that allows a human to play against an unbeatable AI powered by the Minimax Algorithm with Alpha-Beta Pruning.

Hil I'm Sandeep Prajapati

Pre-Final Year B.Tech Computer Science Engineering Student

Who Am I?

I'm a Pre-final year B.Tech Computer Science Engineering student at Galgotias University (Batch 2023-2027), specializing in Artificial Intelligence and Machine Learning. I have a strong foundation in Data Structures and Algorithms using Java, and I actively sharpen my coding and problem solving skills through hands-on projects and regular practice.

Beyond academics, I'm deeply interested in how AI can be combined with software development to create real-world impact. I'm currently building practical experience in Full Stack Web Development working across both frontend and backend to understand how modern, scalable applications come together.

My goal is to grow into a well-rounded Software Engineer with expertise in AI systems, clean and maintainable code, and end-to-end product development. I'm passionate about learning, building meaningful tech, and constantly pushing myself to grow both as a developer and as a thinker.

What I'm Currently Learning

- Full Stack Web Development
- Data Structures & Algorithms
- Artificial Intelligence & Machine Learning
- Critical Thinking & Software Design

Work Experience & Internships

Infosys Springboard | Artificial Intelligence Intern

Jul 2025 - Present

- Assigned to a structured batch-based internship program in AI.
- Exploring real-world AI applications through guided learning paths and practical modules.
- Will soon be working on a capstone AI project involving NLP, data modeling, or real-life use case implementations.

GirlScript Summer of Code (GSSoc'25) | Open Source Contributor & Project Mentor

Jul 2025 – Present

- Contributing to real-world open source projects under mentorship in Java, Python, JS, and ML.
- Reviewing PRs and guiding contributors on Git & GitHub best practices, clean code, and collaboration workflows.
- Helping new contributors understand project structure, version control, and open-source ethics.

Vault of Code | Web Development Intern

Aug 2025 – Present

- Working on building a Student LMS Portal from scratch.
- Developing the frontend using HTML, CSS, React.js, and Bootstrap for a responsive and user-friendly UI.
- Backend development handled using Node.js, with data storage and retrieval through MongoDB.
- Gaining full-stack development experience and collaborating in an agile, project-based environment.

EduSkills (AICTE-Google) | AI/ML Virtual Intern

Jul 2025 – Present

- Selected for the Google AI-ML Virtual Internship under AICTE EduSkills Foundation.

Prodigy Intech | Software Development Intern

May 2025

- Built an efficient Sudoku Solver using Python
- Developed a Contact Management System with add, view, edit, and delete features in Python
- Created an interactive Guessing Game using Java Swing
- Designed a Java Swing app to convert temperatures between Celsius, Fahrenheit, and Kelvin

CodSoft | Artificial Intelligence Intern

May 2025 – Jun 2025

- Worked on image captioning AI models using BLIP
- Used NLP and DeepSeek API via OpenRouter to build an AI chatbot.
- Made Tic-Tac-Toe AI Game that allows a human to play against an unbeatable AI powered by the Minimax Algorithm with Alpha-Beta Pruning.

Project Highlights

Personal Portfolio

Designed and deployed my personal site to highlight my work, internship experiences, and career goals.

Tech Stack: HTML, Vanilla CSS, JavaScript, Web3Forms, OpenRouter API, Hostinger
